

- fast and simple installation
- small number of system components
- available wind deflectors and ballast platforms
- systems available with different tilt angles
- universal ballast and invasive mounting (welded, on rail, and anchored)
- warranty up to 15 years
- increased corrosion resistance due to ZM Coating
- EPDM insulation applied, separating the roof from metal components
- modular design – easy expansion
- module layout – horizontal
- use of PB/PI-10 or PB/PI-15 structures allows the module to be mounted on the long side
- supported roof pitch: 0–5° (possibility of custom design for roofs with different slope)

MATERIAL

Structure and wind deflectors:
steel with anti-corrosion
ZM Coating

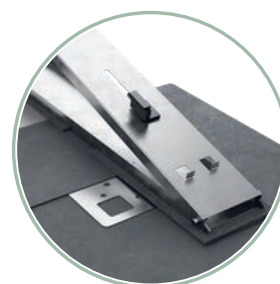

Clamps:
aluminium

Fasteners:
stainless steel

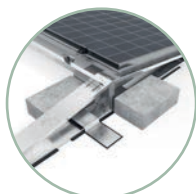

PV module
mounting method

CLAMP

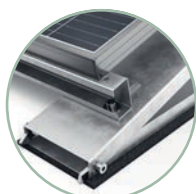

LATCH

System name	Module mounting	Orientation	Rail	Mounting method	Angle (°)	Wind deflector
PB-10	clamp	South/ East-West	50x30x1	ballast	10	yes/no

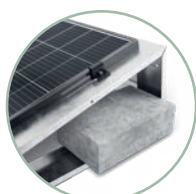

PB-15	clamp	South/ East-West	50x30x1	ballast	15	yes/no
-------	-------	---------------------	---------	---------	----	--------

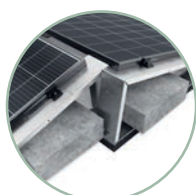

PB-092	clamp/latch	South	none	ballast	25	yes
--------	-------------	-------	------	---------	----	-----

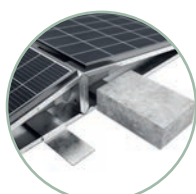

PB-094	clamp/latch	South	none	ballast	15	yes
--------	-------------	-------	------	---------	----	-----

PB-096	clamp	South	none	ballast	15	yes
